PROFESSIONAL SUMMARY

Final-year Digital Business Information Systems student with academic project experience in data analytics, business analysis, and UX/UI design. Passionate about using data to solve business problems and eager to grow through an internship opportunity.

EDUCATION

Bachelor of Business Administration in Digital Business Information Systems *June 2023 – Present*
Mahasarakham Business School, Mahasarakham University, Thailand

- **GPAX: 3.53/4.00**
- Relevant courses: Data Analytics for Digital Business, Big Data Analytics, Business Intelligence System, User Experience and User Interface Design and Development, Web Development for Digital Business

SKILLS

Data & Analytics	RapidMiner, Power BI, Excel, SQL	UX/UI Design	Figma, Wireframing, Prototyping, User Research
Programming	Python (Basic), HTML, CSS, PHP	AI & Automation	Generative AI, n8n workflow
BI & Reporting	Power BI, Data Visualization, PowerPoint	Design Tools	Canva

ACADEMIC PROJECTS

Gold Price Forecasting Model *Data Analytics for Digital Business · 2025*

- Analyzed historical gold price data using machine learning techniques.
- Built and compared Linear Regression, Neural Network, and K-Nearest Neighbors (KNN) models in RapidMiner.
- Evaluated model performance using RMSE, MAE, MSE, and R² to select the most suitable model for forecasting.

Food Delivery App UX/UI Redesign *UX and UI Design and Development · 2023*

- Conducted user research through interviews, questionnaires, and usability testing to identify pain points in existing food delivery applications.
- Designed a mobile prototype in Figma with features including PromptPay QR payment, multi-restaurant ordering, and improved rider communication based on user feedback.
- Created interface screens and user flows to improve the ordering experience and simplify the overall user journey.

Educational Dinosaur Game *AR and Metaverse for Digital Business · 2025*

- Developed an educational game in Roblox Studio to support interactive learning about dinosaurs.
- Designed gameplay, learning activities, and quiz mechanics using Lua.
- Applied Generative AI to support coding and problem-solving throughout the development process.

CERTIFICATIONS & ACTIVITIES

- Introduction to Data Science *Cisco Networking Academy · 2023*
- Microsoft Power BI Training *Professional Qualification Institute (Public Organization) · 2025*
- Generative AI for Research *KUMOOO, Kasetsart University · 2025*
